

HAND RENDERED DIAMOND ETCHING

Classic and elegant, diamond-etched images are by far the most realistic artistic image likeness that can be achieved on stone. Using specialized tools and skilled artistry, master craftsmen expertly transfer the likeness from your photo onto granite, one dot at a time, creating an absolutely stunning life-like result.

Absolute Black granite must be used when creating diamond-etched images, but tiles may be used and set into different colors of stone. Portraits should be no smaller than 7x9 inches to achieve the most realistic results.
