Burial Vault Selection Guide

What a burial vault is, what each one is made of, and what it costs.

UNDERSTANDING BURIAL VAULTS

What Is a Burial Vault?

A burial vault is a concrete container that goes into the grave, and the casket goes inside it. It's lined and sealed, so it keeps water out, and it carries the weight of the earth above it along with the mowers and backhoes that pass over the grave. It's also what stops the ground settling into a dip. That's why the cemetery asks for one.

No Outer Burial Container
No protection

Unlined Outer Container
Limited protection

Lined & Sealed Vault
Full protection

> ### If it isn't lined and sealed, it isn't a burial vault.
>
> The other thing you'll hear about is an outer burial container, sometimes called a gravebox. That's a plain concrete box with drainage holes in it, so ground water runs straight through. It holds the ground up, but it doesn't keep water out, and it isn't lined or sealed. That's the whole difference between the two.

UNDERSTANDING PROTECTION

Three Levels of Vault Construction

There are three levels. All three are reinforced concrete. What changes between them is what the concrete is lined with on the inside and covered with on the outside.

PREMIUM

Bronze or Copper Lined

Reinforced concrete inside a bronze or copper shell, with a metal liner inside that.

TRIUNE

Metal-Lined Concrete

Reinforced concrete with a liner of stainless steel, copper or bronze inside it.

STANDARD

Reinforced Concrete

Reinforced concrete with a textured outer shell. No metal liner.

WHAT WE CARRY

The Vaults Themselves

Fourteen vaults across the three levels. These are the ones we carry. I'll price the exact one you want.

Wilbert Bronze
Premium. Cast bronze outside, reinforced concrete underneath, bronze lining inside. A personalization panel is included. The most expensive vault we carry

Triune series
Bronze, Copper, Stainless Steel, Cameo Rose, and the Veteran Triune in navy with patriotic accents. Reinforced concrete with a metal liner

Standard series
Tribute, Venetian, Continental, Monticello, and the Veteran Salute. Reinforced concrete with a decorative outer shell, no metal liner

CREMATION OPTIONS

Urn Vaults

Smaller vaults, for an urn going into the ground. Same three levels of construction as the casket vaults.

Bronze Triune Urn Vault

Bronze-lined concrete

Copper Triune Urn Vault

Copper-lined concrete

Veteran Triune Urn Vault

Veteran

Stainless steel-lined concrete

Stainless Steel Triune Urn Vault

Stainless steel-lined concrete

Cameo Rose Urn Vault

Stainless steel-lined concrete

Venetian Urn Vault

Reinforced concrete

Also available in Short size at $1,255

Monticello Urn Vault

Reinforced concrete

Also available in Short size at $935

GENERALLY

$935–$1,885

Where a particular one falls in that range depends on the size, the location and the options you choose. I would rather give you a real number than a guess. Call or email me and I will put an exact quote in writing for you, with no obligation.

I'll price the exact one

The vault is one line on a cemetery quote, and which one you choose moves it more than anything else on the sheet. Tell me the level you have in mind and I'll put the exact figure in writing, alongside the rest of the arrangement, with no obligation.
