

Vases and Vase Blocks

The four vases we offer on a 12 by 12 granite block, what each one costs, why bronze costs what it does, and the cemetery's rules for flowers.

SECTION 1

What a Vase and Vase Block Are

A permanent place for flowers that the mowers can pass over

A cemetery vase isn't a vase you set on the grass. It sits in a hole cut into a granite block that's set level with the lawn. When it's holding flowers, it stands upright. When it isn't, it turns upside down and rests flush in the block, so the mowers pass right over it and nothing gets broken.

Every option in this guide uses the same **12 by 12 by 4 inch** granite block, polished on top with sawn sides, with the hole for the vase already drilled. Our own crew sets the block and the vase.

If your loved one has a bronze marker, it can carry its own vase core, the fitting a vase screws into, and the vase can go in the marker instead. The **Bronze Markers** guide covers that. This guide is about a vase on its own block.

WHAT YOU'RE CHOOSING

- **The vase:** gray zinc, or one of three bronze styles
- **The block:** the granite color, which sets its price group
- **Setting it:** one installation charge, \$175

SECTION 2

The Four Vases

These are the only vases the cemetery offers, and why that's the case is in Section 6

Gray Zinc

5" core · vase only

\$315

Cast zinc with a gray finish. It's the simplest vase we offer and the one we keep in stock here, so it can usually be set sooner. Zinc holds up well, but it's softer than bronze and won't last as many lifetimes.

Bronze, Grecian or Veterans

6" core · vase only

\$1,340

Cast bronze by Matthews. The Veterans version carries a cross on the vase and a ring of stars around its base. The Grecian version has a plain ring.

Bronze Doric, Hammered or Grecian ring

6" core · vase only

\$1,405

The Doric vase has a hand-hammered texture, set in either a matching hammered ring or a plain Grecian ring.

Bronze Doric, Floral Innocence ring

6" core · vase only

\$1,445

The hammered Doric vase in the Floral Innocence ring, a ring of cast flowers around the base. This is the most detailed casting we offer.

Prices are for the vase alone. The block, its installation and sales tax are added in Section 4.

SECTION 3

The Granite Vase Block

The same block in every color; the color sets the price

Most families match the block to the marker, so the two read as one memorial. Granite is priced in color groups. The lighter grays and pinks cost the least, and the rarer colors, which are quarried farther away, cost the most. Some colors are imported and carry tariffs, and the price list splits those out.

12×12×4 VASE BLOCK, BY COLOR GROUP	BLOCK
Group 1, non-tariffed Cloud White, Misty Pink, PC Violet	\$525
Group 1, tariffed Cascade Gray, Classic Gray	\$630
Group 2 Absolute Black, Barre Gray, Blue Pearl and others	\$800
Group 3 Balmoral Red, Barre Gray, Cherrywood and others	\$965
Group 4, non-tariffed American Bouquet, Gorman Green and others	\$1,210
Group 4, tariffed Crystal White, Emerald Pearl	\$1,450

Setting the block and vase is \$175, the same for every color. I'll bring granite samples to our meeting, or you can see the colors in the Granite Marker Sizes and Colors guide.

SECTION 4

What It Adds Up To

Vase, 12×12 block and installation, with sales tax

VASE	LEAST COSTLY BLOCK	MOST COSTLY BLOCK
Gray Zinc	\$1,120.56	\$2,141.76
Bronze, Grecian or Veterans	\$2,252.16	\$3,273.36
Bronze Doric, Hammered or Grecian ring	\$2,323.92	\$3,345.12
Bronze Doric, Floral Innocence ring	\$2,368.08	\$3,389.28

The left column uses a Group 1 non-tariffed block and the right column a Group 4 tariffed block, so every other color falls between the two. Sales tax of 10.4% applies to the vase, the block and the installation. I'll put the exact figure for your colors

in writing before anything is ordered.

SECTION 5

Why They Cost What They Do

It's the most common question families ask about vases, and it deserves a straight answer

Bronze is mostly copper. A bronze vase is a solid casting, roughly 85% copper, made in an American foundry and finished by hand. Copper hit record prices in September 2026, around \$6.89 a pound, up from about \$4 at the start of 2025, and the price of every bronze casting follows it. That's the biggest single reason a bronze vase costs what it does today.

Bronze lasts for generations. It doesn't rust, it doesn't crack in a freeze, and it weathers to a deep brown that matches a bronze marker. Families buy it once. Zinc costs far less and holds up well, but it's a softer metal, and over the decades it won't keep its shape and finish the way bronze does.

The block is quarried stone. Each one is cut, polished and drilled from solid granite. Some colors come from overseas, and tariffs added in 2025 raised what those cost, which is why the most expensive group is a tariffed color.

It's set to stay. The price includes our crew setting the block level so it stays put and the mowers can pass over it for as long as the cemetery stands.

If the bronze price is the hesitation

The gray zinc vase on a Group 1 block comes to **\$1,120.56** with tax, about half the cost of bronze. It's a real, permanent vase that meets every cemetery rule. Plenty of families start there.

SECTION 6

The Cemetery's Flower Rules

Why a permanent vase matters, from the Washington Memorial Park rules and regulations

Fresh cut flowers are welcome at any time, in a regulation vase. Without a vase, there's no regulation place for them, and flowers left on the grass are removed by our grounds crew when they become unsightly.

Non-permanent vases aren't allowed. That includes plastic vases, glass vases and anything pushed into the ground. Permanent vases are purchased through the office and installed by the park. Glass is the bigger concern: it can shatter under a mower and injure someone.

Artificial flowers are allowed only during the non-mowing season. Any placed during mowing season are removed and disposed of.

Holiday decorations come down 7 to 14 days after each holiday.

NOT PERMITTED ON A GRAVE

- Plastic or other non-permanent vases
- Glass of any kind
- Balloons and pinwheels
- Planter boxes and decorative rocks
- Photographs and souvenirs
- Preserved flowers
- Enclosures or borders around a plot

Questions, or a time to choose

I'm happy to bring photos and granite samples to a meeting, or walk the park with you to see vases already in place.
